

CIP-ICT PSP-2009-3: Pre-proposal check form

This form may be submitted at any time up to three weeks before the close of call, to the email address given in Annex 1 of the Guide for applicants for ICT PSP Call 3.

First Name Tomáš Surname Trpišovský Gender M

Organisation name Institute of Microelectronic Applications, Ltd., Prague

Country Czech Republic

E-mail tomas.trpisovsky@ima.cz Telephone number +420 251081022

Proposal acronym	RFIDHealth	
Proposal full name	Strengthening healthcare quality and efficiency through RFID implementation	
ICT PSP Call 3 Objective addressed: <i>(as named in the call fiche)</i>	7.2.: Strengthening SME competitive advantage through RFID implementation	
Funding scheme <i>(please indicate one only)</i>	Pilot B	
Approximate total cost <i>(optional information: not applicable to Thematic Networks)</i>	3 000 000 €	

Summary of your proposal's objectives	<p>The objective of the project is to showcase and accelerate the take-up of RFID technologies for healthcare among European SMEs. Results of ASPIRE project – new middleware software for RFID will be used and disseminated. The results of other EU projects (e.g. Europe INNOVA. BioHealth of 6FP, R-Bay of eTEN) will be utilized, too.</p> <p>Proposal aims at RFID pilot implementation in the sector of broad public interest – healthcare. Healthcare sector includes very many opportunities of effective RFID utilization (e.g. healthcare delivery, logistics, administration, transport, environment as well as safety).</p> <p>RFID implementation could also positively influence processes like privacy protection and authentication in the healthcare framework.</p> <p>Project consortium follows long track already, started through TB11 Health of eEurope 2000 -> EFMI WG Cards -> Europe INNOVA.. The core consortium involves all relevant stakeholders of 6 countries to be able to disseminate results and facilitate preparing measures for future deployment of RFID based solutions in healthcare, respecting benefit of European SMEs.</p> <p>Project will be operational for 24 month (including 12 month of deployment in end-user settings).</p> <p>The project consortium will develop set of clear indicators by which the success of the pilots will be measurable. Moreover, adequate contribution to relevant standards to ensure interoperability of RFID technology in healthcare is planned. In doing that, experience and results of previous Europe Innova BioHealth project will be of high value.</p> <p>Specification, implementation and validation reports as well as the business plan for operations beyond the project funding will be prepared..</p> <p>Both broad and focused awareness campaign will be arranged. Expert communication will go through www.bio-health.eu currently utilized for dissemination of RFID standards repository.</p>
